

Tango Telecom powers mBanking initiative in Mexico

Mexico City, 30 May 2012 - Tango Telecom (www.tangotelecom.com) the leading provider of Policy and Charging Control and Next Generation IP Messaging Solutions today announced the successful deployment of its iAX™ USSD Gateway and Service Creation Environment with one of Mexico's largest mobile operators. This deployment will enable the operator's subscribers to access a wide range of innovative and exciting USSD-based services such as mobile banking, account management, billing, roaming and entertainment services.

From now on, all account services including balance query, voucher recharge, Call Me Back and even subscription and top-up management will be accessible to all subscribers irrespective of phone type or data plan via an easy to use USSD menu.

About Tango Telecom

Tango Telecom is the leading global provider of Data Monetisation Solutions for evolving mobile networks. Our high performance solutions are deployed at the core of some of the world's most demanding networks including América Móvil, the Axiata Group and the Telenor Group and currently support over 130 live systems serving 650 million subscribers in 40+ countries.

The Tango Telecom Data Retail Engine, the Tango DRE™, drives service innovation and service velocity to successfully monetise the growing demand for mobile data while optimising the use of network resources. Tango Telecom's solutions are fully virtualised and cloud-available globally, enabling operators to benefit today from the many advantages of network functions virtualisation (NFV).
